

Sean Jones

Recording Artist, Actor

"And the music stirred my soul....." This statement, from one of Canada's premier artists provides us with a deep and intimate look into the heart of one of the country's most exciting and passionate stars.

Sean's first group, BMG male vocal quintet "In Essence" won a Juno for best R&B soul recording in 2004. That same year, the group took home MuchMusic's R&B best video award for the hit "Friend Of Mine," but the intensely focused entertainer was hearing something more in his heart. "After In Essence decided to disband, I bought some guitars and learned how to play. I locked myself away for a year. I didn't think. I just started writing and recording, getting everything in my heart and my head out. I kept hearing this sound all through my development. What came out was very different from my first group, but it felt right." "It's where I wanted to be." Sean describes his new sound as Pop Rock with a soulful feel. Heavy distortion and soaring guitar lines juxtaposed over killer grooves and soulful melodies.

Since signing with WIDEawake Entertainment Group in 2008, Sean has been a busy body, both in and out of the studio. First with the recording of his debut EP "This is love" followed by a nation wide tour with Divine Brown. And things don't seem like they will be slowing down anytime soon. Along with recording his first full length solo album, WIDEawake has big plans for Sean that will include a foray onto the big screen. The multi-talented Jones is scheduled to play Detective Kevin Spencer; in the feature film "Sons 2 The Grave," shooting in Toronto, February 2010.

Sean doesn't take his success for granted and is very serious when it comes to his fans. "They say the digital world makes an even playing field for independent artists. I always want a direct relationship with my fans, so we

can grow together. I want to send them fresh songs, remixes and video blogs as often as I can. And of course for me, it's all about performing live as much as possible. We'll upload some of those shows online as well."

There are many words that could be used to describe Sean Jones. Singer, song writer, actor, model, honest, and genuine are just a few. However, the character trait that best defines this young man is his passion. Yes the music has truly stirred his soul. And if he has his way..... he will stir ours as well.
